

New Product Announcement from ATC

ATC Introduces New Design Kits for 400Z, 400L, and 400S Precision Tolerance NPO RF Microwave SMT Capacitors

May 4, 2015 Huntington Station, NY ----- ATC is pleased to announce the introduction of new Design Kits for 400Z (EIA 0201), 400L (EIA 0402), and 400S (EIA 0603) Series Precision Tolerance NPO RF / Microwave SMT capacitors. These Kits allow the designer to select exact values for circuit prototype development. Each Kit contains up to 16 standard capacitance values between 0.1 pF and 68 pF, giving the engineer the ability to select the exact component value required by the design. All Kit values are guaranteed RoHS-compliant / lead-free.

Advantages:

- Ideal for the most critical tuning applications
- High purity electrodes for repeatable performance
- Low ESR
- High Self Resonance
- Unit-to-Unit Performance Repeatability

Typical Applications:

- Filter Networks
- Matching Networks
- High Q Frequency Sources
- Tuning
- Coupling
- Bypass
- DC Blocking

These Design Kits are in stock and available for purchase on ATC's website at:
