

Press Release

ATC 400 Series S-Parameters Available Online

June 24, 2015, Huntington Station, NY ----- ATC is pleased to announce the availability of specialized electromagnetic measurements, known by designers as scattering parameters (S-Parameters) for the entire family of 400 Series Precision Tolerance NPO RF Microwave SMT Capacitors. S-Parameters are an essential tool to assist circuit designers in component selection for prototype designs. They are available at no charge on the Design Support page of ATC's website. The 400 Series family of Precision Tolerance Capacitors includes three popular EIA Case Sizes: Z (0201), L (0402), and S (0603), to facilitate many RF and Microwave designs. See the following link for ATC's Design Support page:
