

Press Release

ATC 2017 Tech-Select® RF Design Software & Product Catalog CD

March 6, 2017 Huntington Station, NY ----- ATC is pleased to introduce the 2017 Tech-Select Design Software & Product CD. The new 2017 Tech-Select version 9.0 includes enhancements and new features. This Design Support Tool provides access to all RF parameters as well as mechanical dimensions for ATC products, including Smith charts, S- Parameters, effective capacitance, RF current, RF voltage, ESR, Q, complex impedances and more. RF parameters are achieved at frequencies entered by the user. By selecting and sorting on the desired parameters, this program generates a complete list of product options with part numbers. Users may also view and print datasheets or individual performance curves for the selected products. Products displaying the QUIKBuy® logo may also be purchased by using Tech-Select's direct link to ATC's shopsite.

Tech-Select version 9.0 Design Support Tool gives the engineer a clear advantage during design and prototype phases. It allows the designer to incrementally dial in an exact solution for any given application.

There are three ways to access ATC's Tech-Select design software tool.

- Order a free copy of the Tech-Select CD on ATC's website at:
<https://www.atceramics.com/order-cd.aspx?type=cd>.
- Download this design tool from the ATC website, in the Design Support section at:
<http://www.atceramics.com/design-support.aspx>
- Run Tech-Select directly from ATC's website at:
<http://www.atceramics.com/tech-select.aspx>

Tech-Select is compatible with Windows XP, Vista, Windows 7, Windows 8 and Windows 10.
